"A Thing of Beauty is a Joy Forever!"

--Keats.

LOUDON NURSERIES

IRVINGTON, BALTIMORE, MD.

“The joy of a garden lies in more than meets the eye.”

TRAVELERS in Old England, visitors to France and other countries of Europe, are impressed most of all with the gardens. The householder, large or small, without his "patch of color," is the exception rather than the rule. Happily our own country, too, is showing vast improvement in this respect.

To thoroughly enjoy one's home it is necessary to make it attractive, not only in comfort, but in the physical appearance of its surroundings and environment. It is really surprising to know with what comparatively small expense the desired result of garden decoration may be accomplished.

HOWEVER, the original planning of the landscape adornment should be given skilled consideration and expert execution so that the professional gardener can produce the utmost in the area of land available. Here is where the patron and landscape architect may combine their individual ideas so that the union of visionary suggestion and practical development attain a most ideal and successful result.

AS the modern home-builder consults an experienced architect when contemplating the establishment of a house, so those who intelligently plan charming home gardens will seek the services of a competent, sympathetic garden and landscape designer.

INSTEAD of your garden being planted in a more or less hit-and-miss fashion, an intelligent, well-thought plan is prepared and presented covering the entire proposition. Estimates of cost and detailed information of the proposed plantings are interesting parts of our study and report to our clients.

A PLAN of co-operation with your own gardener or with yourself, will provide capable continuation of the original and successful planting. You can readily imagine the relief and comfort such a service contributes to the home gardener--and the cost is comparatively small.

IT is with the sincere desire to add to the beauty and joy of your home that we cordially invite your personal inquiries and it will give us pleasure to assist in every way possible to bring about the ideas for garden decoration you have in mind, or to suggest, after consultation with you, original plans for your garden.

Our aim, then, is to make our customers our clients and to feel that in working for them, we are working with them; to regard the result of our service as important to them as to ourselves, and at all times to uphold the ideals of a vocation so closely allied to Art and Nature.

OUR SCOPE

Complete Plantings	Service
Hardy Flowers	Landscape Designing
Shade and Lawn Trees	Planting, Pruning
Flowering Shrubs	Transplanting of Large Trees
Foundation Plantings	Making of Lawns
Ground Covers and Vines	Complete Garden Construction
Annual Flowers	Weekly Supervision and Care

We shall be most happy to do whatever we can to help you achieve your highest ambition and ideals in the designing, planting and up-keep of your garden or grounds.
